

Receiving Online Donations

Guidance for Parishes

Although regular giving is the bedrock of support for most churches, one-off donations are a very useful additional supplement to this.

Enabling people to donate online can really increase the amount your church can raise for specific appeals and one off events. Online giving and mobile phone giving are generally additional ways to give, not substitutes for regular giving to your church. Your regular givers should continue to give in their usual way, whether that is by standing order / direct debit or by envelope (preferably the former as it is quicker, cheaper and more secure).

Donors may wish to give online over and above their regular giving however; for example, to specific appeals or to mark special occasions. Digital giving can also help attract donations from people who do not normally give; for example, people who do not usually attend church services, people who are attending a wedding or concert or other one-off event, tourists, people moved by a special appeal etc.

Why use Digital Forms of Giving?

We expect the ability for people to give digitally to be significant over the longer term. It will be essential to maintain regular giving, but the ability for people to give one-off donations will remain. The device that they use to do this may move from PC to mobile device, and be accessed via an app rather than a webpage, but this way of giving will remain important.

Attractive to the Donor

- **TIME:** If a transaction takes longer than 30-seconds, 85% of people stop the transaction.
- **LOCATION:** If they can't physically get to church, location often keeps them from giving.
- **MONEY:** People seldom carry cash anymore and dislike complex online forms.
- **CULTURE:** The giving habits of millennials are dependent on cultural relevance.

Using Digital Giving

- Opportunity to receive additional giving via web, text or mobile.
- Set up multiple one-off or regular funds, which members can donate towards.
- Embed the Donate Button into your church website.
- Claims Gift Aid automatically.
- Receive email or text notifications when donations are received.

1. Online Giving

Online Giving is where a donations platform or space is linked to your website so that an individual can make a donation using a variety of payment methods. Most donation platform providers will embed a 'Donate Here' on your website and will also automatically reclaim the Gift Aid.

Fundraising pages are particularly useful for one-off appeals or sponsored events where you are seeking a wide donor base, particularly among younger people or those further afield. An online giving page has now become the most popular way of raising money through a sponsored event such as a walk or run. Although there needs to be wider publicity, and suggestions of how and when to give (for example, a Gift Day could be advertised in the parish magazine) it's convenient and allows people wherever they are to participate.

What you should look for in a Provider

There are now a number of donation platform providers. We recommend your PCC researches the costs and benefits before registering - as well as considering the following:

1. Costs

Costs may include a one-off set-up fee, a regular monthly fee, a % of each gift taken by the provider and the credit/debit card fee or other transaction charge, which may be levied.

2. Benefits

Benefits can include whether the provider will claim Gift Aid for you, how well-known and trusted the provider is, how user-friendly it is for you and your donors, if it sends automated 'thank you' messages, what sort of reporting it provides, if promotional templates are available and whether people doing sponsored events can create team pages.

3. Functionality

Some provider's offer more services than others; for example a mobile app, which your donors can download onto their smartphone. You might also want to look into linking the web page to Facebook, Twitter etc.

Which Provider Should We Use?

Although we cannot recommend one system, we have highlighted (in alphabetical order) the most relevant and affordable providers for churches in the UK for you to compare. Please note there are other providers available.

* CAF DONATE

What they say about themselves: “With CAF Donate you can create GDPR-compliant online donation pages that fit with your charity's branding in minutes. Then add them to your own website or link to them from your emails and social media posts to start collecting donations.”
